

Cluster on Software Engineering for Services and Applications

Introduction

Context

Software Engineering for
Cloud-based applications
Services
IoT
Big data

Cluster objectives

- Identify complementarities, synergies, possibilities for collaboration/results adoption between projects;
- Identify new challenges and trends to influence the European research agenda;
- Organise common dissemination (publications, training and workshops);
- Identify effective go-to-market strategies for the outcomes of research projects.

Deliverables

- A white paper describing a map of the challenges in software engineering and of the initial set of solutions being proposed.
- Possibly, a common book
- A workshop or training initiative
- A go to market strategy and associated implementation plan
- A catalog of researchers available to be part of advisory boards
- An analysis of standardisation activities

The cluster at Cloud Forward 2015

Today 16.20 – 18.20

- Discussion on the presented paper
- White paper:
 - presentation of the current status
 - discussion about challenges and business cases
- Organization of the ICT 2015 session
- The Cloud Expo initiative
- How to get to a “go-to-market” strategy - brainstorming

The cluster at Cloud Forward 2015

Tomorrow 10.15 – 11.45

Discussion on the paper presentations

AppHub presentation

Working time for the subgroups

- White paper
- Standardization
- Go-to-Market strategy
